1 About

1.1 Document

Version: May 17, 2019

This document describes the process for calculating the spread of activities of Melbournians by time of day. The Victorian Integrated Survey of Travel & Activity (VISTA) 2012-16 data is used for this purpose.

2 Data | Victorian Integrated Survey of Travel & Activity

2.1 Sourcing VISTA 2012-16 Data

The Victorian Integrated Survey of Travel & Activity (VISTA) 2012-16 data was downloaded from the following URL on 10th May 2019:

https://transport.vic.gov.au/-/media/tfv-documents/vista/vista_2012_16_v1_sa1_csv.zip

The Zip archive was uncompressed, and the contained CSV files recompressed using GZip giving:

```
./VISTA_2012_16_v1_SA1_CSV/JTW_VISTA12_16_SA1_V1.csv.gz
./VISTA_2012_16_v1_SA1_CSV/S_VISTA12_16_SA1_V1.csv.gz
./VISTA_2012_16_v1_SA1_CSV/H_VISTA12_16_SA1_V1.csv.gz
./VISTA_2012_16_v1_SA1_CSV/P_VISTA12_16_SA1_V1.csv.gz
./VISTA_2012_16_v1_SA1_CSV/JTE_VISTA12_16_sa1_V1.csv.gz
./VISTA_2012_16_v1_SA1_CSV/T_VISTA12_16_SA1_V1.csv.gz
```

2.2 Understanding Trip Data

We use Trip Table (T VISTA12 16 SA1 V1.csv) with these select columns:

Column Description PERSID Person ID number TRAVDOW Travel day day-of-week Origin Purpose (Summary) ORIGPURP1 Destination Purpose (Summary) DESTPURP1 Time of Starting Trip Stage (in minutes, from midnight) STARTIME Time of Ending Trip Stage (in minutes, from midnight) ARRTIME CW_WDTRIPWGT_LGA Trip weight for an 'Average weekday' of the combined 2012-14 and 2014-16 ReportingPeriods, using the ASGC. CW WETRIPWGT LGA Trip weight for an 'Average weekend day' of the combined 2012-14 and 2014-16 ReportingPeriods, using the ASGC.

2.3 Example Trip Record for a Person

PERSID	TRAVDOW	ORIGPURP1	DESTPURP1	STARTIME	ARRTIME	CW_WDTRIPWGT_LGA
Y12H0000126P01 Y12H0000126P01	•	At or Go Home Work Related	Work Related Personal Business	475 580	535 590	139.78 139.78
	Friday	Personal Business Work Related	Work Related	600 1050	610 1125	139.78 139.78

3 Activities by Time of Day

3.1 Extracting Activities from Trip Records

We convert every person's trip record:

PERSID 7	TRAVDOW	ORIGPURP1	DESTPURP1	STARTIME	ARRTIME	CW_WDTRIPWGT_LGA
Y12H0000126P01	Friday	At or Go Home	Work Related	475	535	139.78
Y12H0000126P01	Friday	Work Related	Personal Business	580	590	139.78
Y12H0000126P01	Friday	Personal Business	Work Related	600	610	139.78
Y12H0000126P01	Friday	Work Related	At or Go Home	1050	1125	139.78

To that person's activity record like this:

PERSID	TRAVDOW	ACTIVITY	ACT.START.TIME	ACT.END.TIME	CW_WDTRIPWGT_LGA
Y12H0000126P01	Friday	At or Go Home	0	475	139.78
Y12H0000126P01	Friday	Work Related	535	580	139.78
Y12H0000126P01	Friday	Personal Business	590	600	139.78
Y12H0000126P01	Friday	Work Related	610	1050	139.78
Y12H0000126P01	Friday	At or Go Home	1125	1439	139.78

3.2 Simplifying Activity Labels

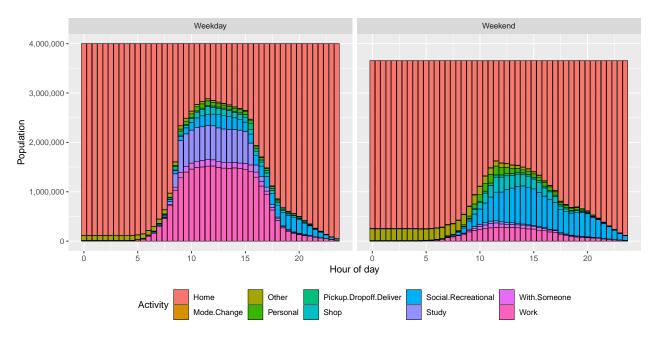

Group activities into activity groups as follows:	A-+ii+ G
Activities	Activity Group
At or Go Home	Home
Accompany Someone	With Someone Change
Mode	Mode Change Unknown purpose
(at start of day), Other Purpose, Not Stated Other	Personal Business
Work Related	Work Education
Buy Something	Shop Social Recreational
Social/Recreational Pick-up or Drop-off Someone, Pick-	-up or Deliver Something Pickup/Dropoff/

3.3 Creating Activity Bins by Time of Day

- 1. Cut the day into fixed time bins of configurable size (30/60/120 mins)
- 2. For every activity record, count CW_WDTRIPWGT_LGA persons in every time bin that overlaps with the activity time
- 3. For any time bins that do not add up to the expected population (sum of CW_WDTRIPWGT_LGA per unique person), scale up the time bin vector of activities to the expected population size, proportionally.

```
dd<-aggregate(activities,by=list(activities$Person),FUN=head,n=1)
popnsize<-sum(dd$Count)
actCounts<-t(apply(actCounts,1, function(x, mx) {(x/sum(x))*mx}, mx=popnsize))</pre>
```

3.4 Activities by Time of Day for Greater Melbourne

4 Activity Chains | or what follows what

4.1 Activity Types

Use our activity groups, but with the Home group refined further as follows:

Activity Type Maj	pping to VISTA Activity
Home Morning	At or Go Home, when first activity of the day
Home Night	At or Go Home, when last activity of the day
Home Daytime	At or Go Home, when not the first or last activity of the day
Mode Change	Change Mode
Other	Unknown purpose (at start of day), Other Purpose, Not Stated
Personal	Personal Business
Pickup/Dropoff/Deliver	Pick-up or Drop-off Someone, Pick-up or Deliver Something
Shop	Buy Something
Social/Recreational	Social, Recreational
